

How To Use This Font

=====

The purpose of this font is to properly display BBS PC-ANSI graphics in the OS X Terminal.

1. Unzip the archive.
2. Double-click the "ASCII.ttf" file.
3. Doing so will launch the "Font Book" app.
4. You will be given the option to install the font.
5. Do so.
6. In the "Font Book" app, the font will appear under the name "New Regular".
7. Launch the Terminal app in /Applications/Utilities.
8. Once it is launched, select "Preferences" under the "Terminal" menu.
9. Assuming that you are following my previous instructions and are using the "Homebrew" theme, select "Homebrew" on the left side of the "Profiles" window.
10. On the "Text" tab, near the top, you will see the option to change the font that you use in the Terminal.
11. Click the "Change" button on the right side of the window.
12. When the "Fonts" window opens, do the following:
 - a. Select "English" under the "Collection" pull-down menu.
 - b. Select "New" under the "Family" pull-down menu.
 - c. Select "Regular" under the "Typeface" pull-down menu.
 - d. Select "24" under the "Size" pull-down menu.
 - e. Close the "Fonts" window by clicking on the red button in the upper left corner of the window.
13. Close the Terminal's "Profiles" window.
14. You are done.
15. You may possibly have to reboot the Terminal in order for the new font to take effect.

Enjoy!

Your BBSing Pal,
The WordWeaver
